

The AOS PowerBank is a Li-Ion battery supplying various voltages like 12VDC, 24VDC and others. The PowerBank is very easy to use and powers AOS 15W LED lights, cameras and more up to 50 Watts power consumption. With the battery capacity of 57Wh even a camera with high power consumption can get an autonomy of several hours.

Specifications

PowerBank Voltage	5V (USB), 12V, 15V, 16,5V, 19V, 20V, 24V selectable by push button
Battery capacity	57 Wh
Type of battery	Li-Ion battery
Charging	13-20 V max. 3A, 16V 2A power supply in scope of supply or via Micro-USB 5V max. 2.1A
Charge/Discharge Control	Display showing voltage and state of charge
Recharging time	3 hours from 0 to 100% with supplied power adapter
Physical Dimension	174 x 78 x 21.5 mm / weight: 450g
