

The AOS LED lights are solid built ultra-bright LED light panels for constant illumination. The solid design for 150g / 11msec makes the LED lights ideal for onboard crash tests. For general illumination the light may be mounded on tripod head or placed on extensions when mounting under tight space restrictions is a must. The heart and core of these lights are ultra-bright LEDs and state of the art control electronic.

Power Input:	24V / 15W
LED Power:	15W continuous
Thermal protection	Not required, continuous operation
Opening Angle:	100° (fix)
Physical Dimension:	h:75 x w:64 x d:40 mm

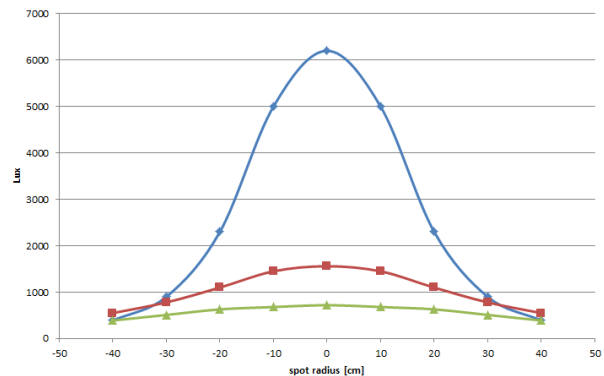

General specifications

Power Input	LEMO connector, 2 Pin / Mating connector cable side: FGG.0B.302.CLAD56
Color temperature	5700°K
Operation	Continuous operation, flicker free
Over temperature protection	Built in over temperature protection
Mounting	All models: Tripod mounting: 1 x UNC 1/4" General mounting: W15: 2 x M6 thread on bottom
High G	150g / 11msec / all axis

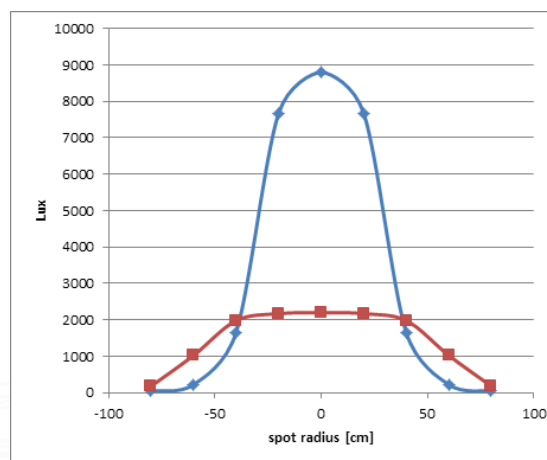

Light output specifications

LED Spectral Range (curve: 5700K)

Light Output A-LED W15 250mm / 500mm / 750mm distance

Light Output A-LED W40 500mm / 1000mm distance

Ordering information

03-412	A-LED W15
Shipment includes	- AOS-LED Light
Power supply	- Power supply not included. Order AOS# 31U2000 (110-230VAC / 24VDC-3.3A) if required
Pin Out	- Pin1: GND
Mating connector cable side: FGG.0B.302.CLAD56	- Pin2: +V
