

The AOS onboard battery is a rugged built ready to use onboard battery supplying 24VDC. The onboard battery is simply and reliable built for the harsh conditions in crash test environment. Charging by the external charging unit is easy without any user interaction required.

Specifications

Battery nominal voltage out	24VDC
Battery capacity	70 Wh
Type of battery	Li-Polymer battery
Charger	115VAC .. 230VAC charger unit is included in scope of supply
Charge Control	Charge condition indication on charger
Recharging time	4h max.
Automatic Switch Over	The onboard battery power input may be used to feed 24VDC of the onboard system to the cameras. In case of power fail the battery switches over automatically to battery supply
Physical Dimension	h:115mm x w:175mm x d:85mm / weight: 2kg
g-rating	100g / 11msec / all axes
Mounting of Controller	Brackets on controller with 4 holes for easy mounting
